Shoulder clip is FAIL_UNIMPLEMENTED_SHOULDER_ONLY.

Reach smallest scaled singular value is 0.023743 m.

Reference pose 0.000586 m is not sufficient and is not a failure.

Those two values are from independent-result.json for this sha256.

The engineering copy is a different file and is not this pin.

Horn fit, unknown masses, heat, creep, powered motion, and a print stay on hold.
